

STANDING RULE — LOCKED EFFECTIVE IMMEDIATELY

- 1. Nexus Command AI Hub is the ONLY source of truth for all AI-assisted builds.
- 2. All writes, logs, telemetry, and generated code go to Nexus Command ONLY.
- 3. The 5S Portal and all other apps are TARGETS — they receive output, not input.
- 4. Kieran initiates all builds through the AI Hub frontend — not direct API calls.
- 5. Simpee does NOT hardcode other app URLs into Hub backend functions.

ARCHITECTURE CHANGE — v1.5 to v1.6

Item	Before (v1.5)	After (v1.6 CLEAN)
aiCommandCentre writes to	5S Portal Notice + Nexus TestLog	Nexus: SChatMessage, ProjectFile, TestLog ONLY
consultCopilot writes to	5S Portal Notice	Nexus: SChatMessage, TestLog ONLY
Target app references	Hardcoded 5S Portal URL	Passed via payload (target_app_id, target_app_name)
AI engine	OpenAI API	Azure OpenAI (kiera-mpv1nhzc-eastus2)
Hub identity	Mixed (portal + hub)	Nexus Command ONLY

AZURE OPENAI — LIVE CREDENTIALS

Field	Value
Endpoint	https://kiera-mpv1nhzc-eastus2.cognitiveservices.azure.com/
Deployment	gpt-4o
API Version	2025-01-01-preview
Secret	AZURE_OPENAI_API_KEY_3 (stored in .agents/.env)
Status	LIVE — tested and confirmed

BACKEND FUNCTIONS — CURRENT STATE (v1.6)

1. aiCommandCentre — ORCHESTRATOR

- Role: Receives Kieran's build instructions, calls Azure GPT-4o, returns structured output
- Writes to: Nexus Command (SChatMessage, ProjectFile, TestLog) — NEVER other apps
- Payload IN: { instruction, target_app_id?, target_app_name? }
- Payload OUT: { analysis, solution, code, builder_instruction, model, pre_screen_passed }
- Status: DEPLOYED v1.6

2. consultCopilot — VALIDATOR

- Role: Final quality gate, reviews code/plans before deploy
- Writes to: Nexus Command (SChatMessage, TestLog) — NEVER other apps
- Payload IN: { question, context? }
- Payload OUT: { answer, model } with VERDICT: APPROVED / REJECTED / NEEDS REVISION

- Status: DEPLOYED v1.6

BUILDER BRIEF — WHAT THE BASE44 BUILDER MUST IMPLEMENT

PRIORITY 1 — Command Panel: Target App Selector

Add target_app_name (dropdown) and target_app_id (auto-fill) fields to the Command Panel form. Pre-populate: 'Nexus Command AI Hub' → 6a1c237bd9f5ff04b6ac7a73 | '5S Portal' → 69edd16e877d6e4391ad74bd | 'New App' → blank.

PRIORITY 2 — Response Panel: Read from SChatMessage

Replace Notice-based INBOX with SChatMessage entity. Filter session_id='ai-command-centre' for Orchestrator, session_id='copilot-validation' for Validator. Show sender badge, timestamp, message body, and Copy Code button.

PRIORITY 3 — Generated Code Tab: ProjectFile Viewer

New tab reading ProjectFile entity, filter project_id='ai-command-centre'. Show filename, target app (from notes), language badge, syntax-highlighted content block, Copy and Download actions.

PRIORITY 4 — TestLog Status Strip

Compact strip at page bottom showing last 10 TestLog entries. Columns: test_name, status (green/red/amber), validator, tested_at.

AI TEAM — CONFIRMED (v1.5 LOCKED, CARRIED FORWARD)

Role	Duty Name	Model	Status
ORCHESTRATOR	Simpee	Base44 Agent	Active
RESEARCHER + LOGGER	Gemini	Gemini 2.0 Flash (free)	Active
ANALYST + MONITOR	Analyst	Claude Sonnet 4.6	Active
STRATEGIST	Strategist	Claude Opus 4.6	Active
THINK TANK	Think Tank	Claude Opus 4.8	Active
ENGINEER	Engineer	GPT-5.4 (Azure)	Active
ARCHITECT	Architect	GPT-5.5 (Azure)	Active
VALIDATOR	Copilot/Edge	Microsoft	Active
QC INSPECTOR	CodeRabbit AI	coderabbit.ai	Pending hire

NEXT MILESTONE — v1.7

- Canva DESIGNER role integration
- Ethics AI role assigned
- KnowledgeLog entity as single truth layer
- First full 10-stage pipeline run: Define → Research → Analyse → Report → Plan → Build → Test → Debug → Approve → Deploy
