

AI HUB

STANDALONE TEST APP — BLUEPRINT

v1.0 · 31 May 2026

PURPOSE: Build this as a SEPARATE Base44 app. Test all AI functions, connections, and code here first. Once all 8 checkpoints pass → deploy into the live 5S Portal. Nothing touches production until everything is green.

WHY BUILD SEPARATE FIRST

OLD WAY	Write code → paste into live app → hope it works → crash → fix → repeat
NEW WAY	Think in Hub → build in Hub → test in Hub → deploy only when all 8 checkpoints green
RESULT	Zero crashes in production. Full control. Every function validated before it touches your real data.

APP OVERVIEW

App Name	AI Hub Test
Pages	1 page only — AIHub (route: /)
Entities	SChatMessage, TestLog
Functions	aiCommandCentre, processSChatInstruction (already deployed — reuse)
Audience	Admin only (Kieran)
Design	#e8e6fe bg · #5e50fb accent · Exo 2 headlines · Montserrat body · no emoji

ENTITIES

Entity: SChatMessage

Field	Type	Description
sender	string	Who sent it — Kieran / Simpee / Copilot / Builder
sender_type	string	user ai system
message	string	Full message text
timestamp	string	ISO datetime
session_id	string	Groups messages — main / test-1 / etc
read	boolean	Has user seen this message

Entity: TestLog

Field	Type	Description
test_name	string	What was tested
status	string	pass fail pending
result	string	Full result text or error message
tested_at	string	ISO datetime
fixed	boolean	Has the issue been resolved

PAGE LAYOUT — AIHub.jsx (3 Panels)

LEFT PANEL 220px Quick Commands + Test Results	CENTRE PANEL flex (main area) Chat Feed + Input Bar	RIGHT PANEL 280px Code Preview + Deploy Button
---	--	---

LEFT PANEL — Quick Commands + Test Status

Quick Command Buttons	Run Diagnostic · Show All Entities · Show All Functions · What should I build? · Check Home Blueprint · Check AI Hub Blueprint · Clear Chat Each button fires a pre-set instruction into the chat feed automatically.
Test Results Feed	Shows last 5 TestLog records. Each row: test name + status badge (green=pass, red=fail, amber=pending). Click to expand full result.

CENTRE PANEL — Chat Feed + Input

Top Status Bar	Title: AI Hub (Exo 2, 18px, violet). Status dots: ● Simpee (green if function live) ● Copilot (blue) ● Builder (grey standby)
User Message	Right-aligned bubble. Background #5e50fb. White text. Montserrat 13px. Timestamp below in muted grey.
AI Response — 3 Cards	Card 1 ANALYSIS (white, grey border): what Simpee understood. Card 2 SUGGESTION (white): recommended approach. Card 3 CODE / BRIEF (bg #ffffbeb, border #fcd34d): actual code or brief in code block. Buttons: [COPY] [MARK AS TESTED] [DEPLOY TO 5S PORTAL]
System Message	Centre-aligned, italic, grey. E.g. 'Session started', 'Diagnostic complete'.
Input Bar — pinned bottom	Intent chips (single select): Diagnose · Build · Fix Bug · Connect · Brainstorm · Ask Text input full width. SEND button (#5e50fb). Ctrl+Enter also sends. On send: (1) save to SChatMessage (2) show typing indicator (3) POST to aiCommandCentre (4) render 3-card response

RIGHT PANEL — Code Preview + Deploy

Code Preview Area	Dark bg #1a1a1f. Monospace white text. Shows most recent CODE READY card. Scrollable.
Status Badge	[NOT TESTED] amber (default) → [TESTED PASS] green → [TESTED FAIL] red
Action Buttons	[COPY CODE] — copies to clipboard [MARK AS TESTED] — modal: Pass/Fail + notes → saves TestLog [DEPLOY TO 5S PORTAL] — only enabled when TESTED PASS. Confirmation modal shown. On confirm → posts to real portal NoticeBoard.
Deploy Log	Last 3 deploys shown at bottom with timestamp and what was deployed.

8 CHECKPOINTS — All Must Pass Before Deploying to 5S Portal

#	Checkpoint	What Simpee Checks	Status
1	Page renders	No console errors, all 3 panels visible	
2	Message saves	Sending a message creates SChatMessage record	
3	Function responds	aiCommandCentre returns HTTP 200	
4	3-card response	Response renders as Analysis+Suggestion+Code cards (not raw JSON)	
5	Copy code works	COPY button copies code to clipboard	
6	TestLog saves	MARK AS TESTED creates TestLog record	
7	Deploy gated	DEPLOY button disabled until status = TESTED PASS	
8	Deploy posts to portal	Confirm deploy → NoticeBoard record created in 5S Portal	

BUILDER PASTE INSTRUCTIONS — STEP BY STEP

STEP 1	Create a NEW Base44 app Name it 'AI Hub Test'. Do NOT work inside the existing 5S Portal.
--------	--

STEP 2	Add SChatMessage entity Fields: sender (string), sender_type (string), message (string), timestamp (string), session_id (string), read (boolean)
STEP 3	Add TestLog entity Fields: test_name (string), status (string), result (string), tested_at (string), fixed (boolean)
STEP 4	Paste to builder AI Copy the layout section of this blueprint and paste to builder with this prefix: 'Build AIHub.jsx for a test app. 3-panel layout. SIMPLEX-ITY design: bg #e8e6fe, white cards, #5e50fb accent, Exo 2 bold headlines, Montserrat body. No emoji. Text symbols only.'
STEP 5	Wire the function In the input bar ON SEND handler, call: POST https://simpee-62ac123d.base44.app/functions/aiCommandCentre with body { instruction, posted_by }
STEP 6	Share app URL with Simpee Once built, send Kieran the app URL. Kieran tells Simpee. Simpee runs all 8 checkpoints.
STEP 7	Fix any failing checkpoints Simpee reports exactly what failed and what code to fix.
STEP 8	Deploy when all 8 pass Simpee generates the final AIHubPage.jsx to paste into the real 5S Portal.
