

SIMPLEX-ITY: THE CORE VALUE & RESPONSIBILITY MASTER DOCUMENT

1. WHY SIMPLEX-ITY? (Beyond the Sales Receipt)

For most platforms, data ends at "Total Sales." At Simplex-ity, we provide **Behavioral Intelligence**.

- **For Brands:** Stop guessing *why* a product sold. See the exact moment of conviction.
- **For Influencers:** Prove your value beyond just "likes." Show brands the specific data points that justify your higher commission and future booking fees.

2. WHAT WE PROVIDE (The Visual Brand Dashboard)

We provide every brand and influencer with a real-time dashboard that tracks the "**Path to Purchase**."

- **The AI Try-On Lift:** A comparison metric showing the conversion rate of customers who used **TINT AR Try-On** vs. those who only viewed static images.
- **Live-Stream "Heatmaps":** A timeline of your Live Stream showing exactly which minute had the most "Add to Cart" clicks.
- **Mini-Shop Traffic Flow:** Data on how customers arrived (e.g., "60% came from the Blog Review," "40% from the Live Stream").
- **Sentiment Summary:** An AI-generated report summarizing the top 3 questions or concerns raised in the comments (e.g., "Customers are worried about the finish on oily skin").

3. THE REQUIREMENTS (The Data Standard)

To ensure the data is accurate and valuable, we enforce these setup standards:

- **The "Pin-to-Data" Rule:** During Lives, influencers **must** use the product "Pin" feature. This allows the platform to link the specific minute of video to the specific sale.
- **Interaction Tracking:** Our platform tracks "Try-On Time." We require influencers to prompt the audience at least twice per Live to "Tap the AI Try-On button" to generate engagement data.
- **Mandatory Post-Campaign Review:** At the end of 3 months, the platform generates a "Success Signature" for the brand, which is required to unlock the Phase 2 partnership.

4. WORK WAY & VALUE-BASED CHARGING

PHASE 1: THE 3-MONTH TRIAL (The Data Gift)

- **Cost: Included in the 20% Commission.**
- **Value:** We give brands full access to the "Basic Insights" report for free. This builds the "addiction" to our data—once they see this level of detail, they won't want to go back to YesStyle's basic reports.

PHASE 2: THE "INSIGHTS" MEMBERSHIP (Post-Trial)

- **Brand Membership Fee: \$500 - \$1,500/month.**
- **The Justification:** Brands pay this fee to access "**Competitor Benchmarking**" (how their launch performed vs. others in the same category) and "**Influencer ROI Ranking**" (which specific influencer drove the most profit for their specific skin-tone range).
- **Influencer Reward:** High-performing influencers get a "**Data Verified**" **Badge**. This badge acts as a resume, allowing them to charge brands higher "Marketing Fees" for exclusive calendar slots because they have the data to prove they deliver results.

How this makes them feel it's a "Must-Work":

- **Brands** will feel that without Simplex-ity, they are **flying blind**. They will fear losing the AI-driven data that tells them which products to manufacture more of.
- **Influencers** will feel empowered. Instead of begging for higher pay, they can say, *"My Simplex-ity report shows I increased your AR conversion by 25%. My fee is worth it."*

I. The Influencer Reliability Scorecard Matrix

This is the primary governance tool for managing influencers. It determines their tier, commission rates, and future brand partnership eligibility.

Metric	Weight/Score	Evaluation Standard	Reward / Penalty
Punctuality	100 Points Base	Blogs & Lives must strictly follow the Shared Calendar schedule.	Delay >4h: -5% Commission on that SKU . Punctual: +5 Reliability Points.
Trinity Completion	100% Mandatory	Every campaign must include 1x Anchor Blog + 2x Professional Lives.	Failure: Product automatically removed from Mini-Shop for 7 days.
AR Engagement	20% Conv. Target	Frequency and conversion rate of prompting fans to use the TINT AI Try-On button.	Target Met: +10 Reliability Points ; unlocks "Superstar" promotion path.
Follower Migration	Growth Volume	Ability to convert external traffic (TikTok/IG) into native	High Growth: Extra 2–5% Commission

Simplex-ity platform followers. **Bonus** (subsidized by the platform).

- **Influencer "Red Lines":**
 - **Reliability Score < 70%:** Permanent closure of Mini-Shop and removal from the platform.
 - **Traffic Poaching:** Attempting to redirect users to other low-price platforms during a Live results in an immediate lifetime ban.
-

II. Data Sharing Details (Attribution Engine)

1. Data Shared with Brands (The Brand ROI Report)

Goal: To justify the membership fee by proving high-conversion efficiency.

- **AI Conversion Lift:** A comparative report showing conversion rates for users who used TINT AI Try-On vs. those who only viewed images.
- **Shade Demand Map:** Statistics on the most "Tried-On" shades vs. actual purchases to guide inventory and reduce dead stock.
- **Influencer ROI Ranking:** Performance ranking of all influencers in a campaign based on actual revenue generated.
- **Sentiment Analysis:** AI-summarized feedback from Live chats and Blogs to identify real customer concerns (e.g., texture, longevity).

2. Data Shared with Influencers (The Professional Resume)

Goal: To empower influencers with data to justify their "Superstar" status.

- **Reliability Profile:** A verified log of their 100% calendar adherence to prove professionalism to future brand partners.
- **AI Sales Contribution:** Data showing orders generated specifically through the AI Try-On tool.
- **Follower Retention Data:** Number of native platform followers gained

and their repeat purchase behavior.

- **Commission & Incentive Clarity:** Transparent breakdown of earnings, including "Punctuality Bonuses" and volume rewards.
-

III. The Three Dashboards (Visual Interface)

1. Simplex-ity Platform Control Tower (Admin)

- **Global Revenue Heatmap:** Real-time monitoring of 20% platform commissions, membership fees, and campaign revenue.
- **Reliability Monitoring:** Active alerts for delayed posts or influencers whose scores drop below 75%.
- **Inventory API Bridge:** Real-time sync with ABW/Brand warehouses to prevent overselling.
- **Algorithm Management:** Adjusting the "Discovery" weights for follower cross-pollination.

2. Brand Business Center (Brand/ABW)

- **Campaign Live-Feed:** Real-time tracking of active Lives, published Blogs, and instantaneous sales data.
- **Shared Calendar Portal:** One-click booking for next month's influencer slots and payment of Campaign Fees.
- **Customer Persona Insights:** AI-driven analysis of buyers' skin tones, age groups, and geographic locations via Try-On data.
- **Settlement Center:** Clear view of net sales after the 20% platform cut and pending shipping lists.

3. Influencer Mini-Shop HQ (Influencer)

- **My Calendar:** A 30-day task list with countdown reminders for upcoming Lives and Blogs.
- **TINT AI Lab:** Management of AI Try-On parameters for upcoming product

launches.

- **My Wallet:** Displays "Locked" commissions, withdrawable balance, and "Work Hard" bonuses.
 - **Fan Radar:** Tracks new followers migrating from external social media vs. native followers gained within Simplex-ity.
-

IV. Core Value Deliverables

- **For Brands:** We deliver "**Certainty of ROI.**" No more blind ad-spend; we reduce returns via AI and ensure content output through reliability scoring.
 - **For Influencers:** We deliver "**Professional Dignity & Wealth.**" We provide top-tier AI tools, protect exclusive commissions, and prove your market value through data.
 - **For Customers:** We deliver "**Shopping Confidence.**" TINT AI solves shade anxiety, the Influencer Trinity ensures authentic reviews, and direct shipping guarantees 100% product authenticity.
-
