

5S PORTAL

MASTER PAGE BLUEPRINT SYSTEM

Version 1.0 · 31 May 2026

PURPOSE OF THIS DOCUMENT: This is the single source of truth for the 5S Portal build. Every page, function, entity, and connection is defined here. Before any build session, run a diagnostic. Before pasting code to the builder, share the relevant page blueprint. After every change, update this document and the backend record. **Simpee, Edge/Copilot, and the Base44 Builder AI must all read from this document.**

THE 3-STEP RULE — Every Build Session

STEP 1	DIAGNOSE	Ask Simpee 'run diagnostic' → get health report of all entities, functions, connections. Fix any issues
STEP 2	ALIGN	Share the relevant page blueprint to the builder AI. Everyone reads the same spec.
STEP 3	BUILD	Builder executes. Simpee validates output. Blueprint record updated in backend.

DESIGN SYSTEM — Apply to All Pages

Token	Value	Usage
Background	#e8e6fe	Page background (Lavender Wash)
Container	#ffffff	All cards and panels
Accent Violet	#5e50fb	Buttons, active states, highlights
Soft Lilac	#bab4fd	Borders, secondary accents
Body Text	#1a1a1f	All main text
Muted Text	#9896ad	Labels, secondary info
Headline Font	Exo 2 / Exo	All headings, uppercase labels
Body Font	Montserrat	All body text, inputs
Border Radius	12–14px (cards), 8–9px (buttons)	Consistent rounding
Shadow	0 2px 8px rgba(94,80,251,0.06)	Subtle depth on cards
Icons	Text symbols only: ✓ ■ ■ ■ ■ ■	No emoji, no cartoon icons

SYSTEM DIAGNOSTIC — Run: 31 May 2026 19:27 HKT

Entity / Function	Records	Status	Notes
ComplianceItem	6	HEALTHY	
Expense	23	HEALTHY	
Invoice	3	HEALTHY	
Project	4	HEALTHY	
Brand	2	HEALTHY	
TeamMember	3	HEALTHY	Kieran, Loreen, Wilson
NoticeBoard	10	HEALTHY	Blueprints stored here
CalendarEvent	7	HEALTHY	
VaultItem	22	HEALTHY	
BankAccount	3	HEALTHY	

HRRecord	4	HEALTHY	
Document	23	HEALTHY	
Note	6	HEALTHY	
SChatMessage	0	HEALTHY	Empty, ready for AI Hub
aiCommandCentre (fn)	—	LIVE	Responding OK
processSChatInstruction (fn)	—	LIVE	Responding OK

ISSUES TO RESOLVE

ID	Issue	Priority	Fix Required
ISSUE-001	Home page is BLANK	CRITICAL	Rebuild pages/Home.jsx — 4 sections
ISSUE-002	AI Hub page is BLANK	HIGH	Build pages/AIHubPage.jsx clean
ISSUE-003	BuildProject entity API inaccessible	MEDIUM	Check entity schema in builder
ISSUE-004	SChatMessage not connected to any UI	HIGH	Wire to AI Hub chat feed
ISSUE-005	No OpenAI key configured	MEDIUM	Add key to enable full AI responses

PAGE BLUEPRINTS

PAGE — HOME			BLANK — Priority 1 Rebuild
File: pages/Home.jsx	Route: /home	Data: CalendarEvent, NoticeBoard, User	

AUDIENCE: All users (view) | Admin + Manager (post notices) | Admin (AI Hub entry)

PERMISSIONS: All=view | Admin+Manager=post notices, add events | Admin=see AI Hub banner

PURPOSE: First screen every user lands on. Shows what's happening today — calendar events, company announcements, and for Kieran (Admin), direct access to the AI Hub command centre.

SECTIONS:

1 — HEADER	Greeting with user name (time-based: morning/afternoon/evening) + HK date + role badge top-right
2 — SHARED CALENDAR	CalendarEvent entity. 7-day horizontal strip. Color by type: Compliance=#f59e0b, Meeting=#3b82f6, Deadline=#ef4444. Admin+Manager can add events. All users view.
3 — COMPANY NOTICE BOARD	NoticeBoard entity. Pinned notices first. Priority color: HIGH=red left border, MEDIUM=amber, LOW=green. Admin+Manager can post. Max 5 shown + View All link.
4 — AI HUB BANNER	Admin only. Full-width gradient banner (#5e50fb → #8c82fc). Title: AI Hub — Command Centre. Button: OPEN AI HUB → navigates to /ai-hub.

■ ISSUE-001: Page is blank — needs full rebuild

PAGE — AI HUB			BLANK — Priority 2 Rebuild
File: pages/AIHubPage.jsx	Route: /ai-hub	Data: SChatMessage entity. API: POST https://simpee-62ac123d.base44.app/functions/aiCommandCentre	

AUDIENCE: Admin only (Kieran)

PERMISSIONS: Admin only

PURPOSE: Highest authority command centre. Single chat interface where Kieran types one message, Simpee + Copilot analyse and respond, code is generated ready to paste or auto-send to builder. Diagnose issues, request features, build connections — all from one place.

SECTIONS:

A — STATUS BAR	Simpee online (green pulsing dot) Copilot ready (blue dot) Builder standby (grey dot). Live connection status visible at all times.
B — CHAT FEED	SChatMessage entity. User messages right-aligned (#5e50fb bg, white text). AI messages left-aligned (white card, #e6e6e6 border). AI responses render as 3 cards: Analysis (white) + Suggestion (white) + Code/Builder Brief (yellow #ffffeb). Each AI response has [COPY CODE] and [SEND TO BUILDER] buttons.
C — INPUT BAR	Pinned to bottom. Intent chips above input: Diagnose / Build / Fix / Connect / Ask. SEND saves to SChatMessage first, then calls aiCommandCentre. Ctrl+Enter to send.
D — QUICK COMMANDS	Pre-set buttons: Run Diagnostic Show All Pages Show Functions What to build next Check entity health

- ISSUE-002: Needs clean rebuild
- ISSUE-004: SChatMessage not connected to UI yet
- ISSUE-005: No OpenAI key — responses are placeholder

PAGE — DASHBOARD		LIVE — Do not rebuild
File: pages/Dashboard.jsx	Route: /dashboard	Data: Expense, ComplianceItem, RenewalItem, Outlook connector

AUDIENCE: Admin + Manager

PERMISSIONS: Admin + Manager

PURPOSE: Executive view. Live KPIs, top risks, email summary, cost reduction suggestions.

SECTIONS:

Stats Row	Total Expenses (HKD), Pending Approvals, Renewals Due (30d), Compliance Items
Risk Panel	Expired renewals, overdue items
Email Summary	Recent emails from connected Outlook
Cost Reduction	AI-generated cost saving suggestions

PAGE — FINANCE		LIVE — Stable
File: pages/FinancePage.jsx	Route: /finance	Data: Expense (23), BankAccount (3)

AUDIENCE: Admin + Finance role

PERMISSIONS: Admin=full | Finance=read+add expenses

PURPOSE: Expense ledger (23 records), subscriptions tracker, bank account overview.

SECTIONS:

Expense Tab	Full expense table with receipt links, status toggle, category filter
Subscriptions Tab	Recurring services with costs, renewal dates, toggle active/inactive
Bank Accounts	3 accounts: balance overview, entity, currency

PAGE — INVOICES		LIVE — Stable
File: pages/InvoicePage.jsx	Route: /invoices	Data: Invoice (3)

AUDIENCE: Admin + Finance

PERMISSIONS: Admin=full | Finance=view+create

PURPOSE: Create, view, and manage client invoices. PDF generation. Airwallex sync.

SECTIONS:

Invoice List	Table of all invoices with status, amount, client, due date
Create Invoice	Modal form: client, line items, tax, currency, payment method
PDF Export	Generate branded PDF invoice

HOW TO USE THIS BLUEPRINT WITH THE BUILDER AI

1. Pick the page you want to build from this document.
2. Copy its blueprint section (sections, data, permissions, purpose).
3. Paste this prefix first: 'Build this page for the 5S Portal exactly as described. Use the SIMPLEX-ITY design system: bg #e8e6fe, white cards, #5e50fb accent, Exo 2 headlines, Montserrat body. No emoji icons.'
4. Paste the blueprint section after it.
5. Ask Simpee to validate the output once builder is done.
6. Simpee updates the blueprint record in the portal backend with the new status.
