

BLUEPRINT A — SHARED CALENDAR PAGE

5S Portal · SIMPLEX-ITY · Phase 1 Build · 1 June 2026

Paste this entire brief into the Base44 Builder AI

STEP 0 — CLEAN PORTAL INBOX FIRST (do this before building)

Before building the calendar, the builder must clear all stale pinned notices from the real 5S Portal.

In the Base44 data panel for app 69edd16e877d6e4391ad74bd, find the Notice entity and:

Action	Unpin ALL existing notices (set pinned=false). Do not delete — just unpin.
Why	The portal inbox is full of stale 'CODE READY' notices from previous sessions. They clutter the view and confuse users.
Confirm	After unpinning, post one new Notice: title='■ Portal Reset — 1 June 2026', section='system', posted_by='Simpee', pinned=true, content='Portal inbox cleared. Ready for new builds.'

STEP 1 — PAGE IDENTITY

File	pages/CalendarPage.jsx
Route	/calendar
Menu label	Calendar
Menu icon	■ or text symbol ■
Audience	All users — view. Admin + Manager — create/edit/delete events.
Entity	CalendarEvent (already exists in this app)
Entity fields	title, type, campaign_id, campaign_title, influencer_id, influencer_name, brand_name, due_date, status, notes

STEP 2 — DESIGN SYSTEM (apply to every element)

Page background	#e8e6fe (Lavender Wash)
Card background	#ffffff (White)
Accent / buttons	#5e50fb (Violet)
Soft accent	#bab4fd (Soft Lilac)
Body text	#1a1a1f
Muted text	#9896ad
Headlines font	Exo 2, bold, uppercase labels
Body font	Montserrat
No icons	Use text symbols only — ■ ■ ✓ ■. NO cartoon pictograms.
Card radius	14px cards, 9px buttons
Shadow	0 2px 8px rgba(94,80,251,0.06)

STEP 3 — PAGE LAYOUT (3 sections, single column)

Section A — Page Header

Title	"SHARED CALENDAR" — Exo 2, bold, #5e50fb, 22px
Subtitle	"Team events, deadlines, and meetings" — Montserrat, #9896ad, 13px
Top right	View toggle: [MONTH] [WEEK] — active tab bg=#5e50fb white text, inactive bg=white border=#bab4fd
Add button	"+ ADD EVENT" — bg=#5e50fb, white text, 9px radius. Visible to Admin + Manager only.

Section B — Calendar View (main area)

MONTH view	Standard 7-column grid. Each day is a cell. Events shown as colored chips inside the cell. Today's cell has bg=#e8e6fe border=#5e50fb.
WEEK view	7 columns (Mon–Sun). Each column shows the day's events stacked vertically. Time not required — just event chips.
Event chip	Rounded pill: bg = event color (see type colors below), white text, 11px font, truncated if too long.
Click event	Opens a modal with full event details: title, type badge, due_date, status, notes, brand_name/influencer_name if set.
Empty day	Light grey dashed border. Text: '—' centred in muted grey.

Section C — Event Type Color Legend (shown as a small row below the calendar)

Compliance	#f59e0b — Amber
Meeting	#3b82f6 — Blue
Deadline	#ef4444 — Red
Campaign	#8b5cf6 — Purple
Personal	#22c55e — Green
Holiday	#14b8a6 — Teal
Default	#9896ad — Grey

STEP 4 — ADD EVENT MODAL

Trigger	"+ ADD EVENT" button click
Modal title	"New Event" — Exo 2, bold, #5e50fb
Fields	Title (text, required) · Type (dropdown: Compliance/Meeting/Deadline/Campaign/Personal/Holiday) · Due Date (date picker, required) · Status (dropdown: Upcoming/In Progress/Done/Cancelled) · Brand Name (text, optional) · Notes (textarea, optional)
Save action	CalendarEvent.create({ title, type, due_date, status, brand_name, notes })
Cancel	Closes modal, no save
Validation	Title and Due Date are required. Show inline error if empty on submit.
Permissions	Only Admin and Manager roles see the + ADD EVENT button and can submit the modal.

STEP 5 — EDIT & DELETE

Edit	Admin/Manager clicking an event chip → modal opens pre-filled. 'SAVE CHANGES' button calls CalendarEvent.update(id, data).
------	--

Delete	Inside edit modal, 'DELETE' button (red, right-aligned) calls <code>CalendarEvent.delete(id)</code> . Confirm dialog first: 'Delete this event?'
Staff users	Click event → read-only modal. No edit/delete buttons shown.

STEP 6 — DATA LOADING

Load	On page mount: <code>CalendarEvent.list()</code> — fetch all records.
Filter by month	When user navigates to a different month, filter loaded events by <code>due_date</code> within that month range.
Loading state	Show a pulsing lavender placeholder while fetching. Never show a blank screen.
Empty state	If no events this month: centre card with text 'No events this month. Click + ADD EVENT to get started.' Only show add button if Admin/Manager.
Error state	If fetch fails: 'Could not load calendar. Please refresh.' — no crash.

STEP 7 — NAVIGATION

Month nav	← Previous Month [Month Year] Next Month →. Arrows are #5e50fb, bold.
Week nav	← Previous Week [Week range e.g. 1–7 Jun 2026] Next Week →.
Today button	Small 'TODAY' pill button — jumps back to current month/week. <code>bg=#e8e6fe text=#5e50fb</code> .

STEP 8 — MENU REGISTRATION

Add 'Calendar' to the sidebar navigation menu in `App.jsx` (or wherever the nav is defined).

Label	Calendar
Route	<code>/calendar</code>
Position	After Home, before Dashboard
Visibility	All roles
Symbol	■ Calendar

STEP 9 — QUALITY CHECKS (builder must verify before done)

Check 1	Month view renders with correct days for June 2026
Check 2	Week view toggles correctly
Check 3	Add event modal opens, saves, and new event appears on calendar without page refresh
Check 4	Staff user sees calendar but no add/edit/delete buttons
Check 5	Event chips show correct colors per type
Check 6	Empty state shows when no events
Check 7	Page background is #e8e6fe, cards are white, accent is #5e50fb
Check 8	No cartoon icons — text symbols only
Check 9	Calendar added to sidebar navigation and is accessible
