

COMMAND AI HUB

SIMPLEX-ITY · 5S PORTAL · STANDALONE TEST APP BLUEPRINT

Version 1.1 · 31 May
2026

Co-authored: Kieran Li + Simpee + Edge (Copilot)

WHAT'S NEW IN v1.1 — Edge / Copilot Additions

Copilot Validation Layer	AI-assisted code review by Copilot before any deploy. Checks syntax, logic, security, and Azure readiness.
Azure Readiness	Stub connectors for future Azure integration. Tested via 'Azure Dry Run' quick command in left panel.
Expanded Entities	SChatMessage gains role field (brainstorm backend validation). TestLog gains validator field (Simpee).
Dual Confirmation Deploy	DEPLOY button requires BOTH Simpee validation + Copilot validation before enabling. Double safety gate.
9th Checkpoint	Copilot Validation added as checkpoint 9 — reviews code for syntax, logic, security, and Azure readiness.
New Quick Commands	Run Copilot Validation + Azure Dry Run added to left panel. Blueprint button added for one-click blueprint.

PURPOSE: Build this as a SEPARATE Base44 app. Test all AI functions, connections, and code here. Once all 9 checkpoints pass (including Copilot validation) → deploy into the live 5S Portal. **Nothing touches production until Simpee AND Copilot both confirm green.**

4 PILLARS

THINK	Brainstorm with Simpee + Copilot before writing a single line of code.
BUILD	Generate and preview code inside the Hub. Nothing touches production yet.
TEST	Run all 9 checkpoints. Simpee validates logic. Copilot validates syntax + Azure readiness.
DEPLOY	One button. Enabled only after dual confirmation (Simpee + Copilot). Clean code to live portal.

APP SPECIFICATION

App Name	Command AI Hub (separate from 5S Portal)
Pages	1 page — CommandAIHub.jsx (route: /)
Entities	SChatMessage · TestLog
Functions	aiCommandCentre · processSChatInstruction (reuse existing)
Audience	Admin only — Kieran Li
Design	bg #e8e6fe · cards #ffffff · accent #5e50fb · Exo 2 headlines · Montserrat body · no emoji
AI Stack	Simpee (logic + code) · Copilot/Edge (validation + Azure) · Builder AI (execution)

ENTITIES — v1.1 (with new fields)

SChatMessage — Chat history between Kieran and all AIs

Field	Type	Description / Values
sender	string	Kieran / Simpee / Copilot / Builder
sender_type	string	user ai system
role	string	brainstorm backend validation ← NEW in v1.1
message	string	Full message or response text
timestamp	string	ISO datetime — auto-fill on create
session_id	string	Groups messages: main / test-1 / brainstorm-1 etc

read	boolean	Has Kieran seen this message
------	---------	------------------------------

TestLog — Results of every checkpoint test

Field	Type	Description / Values
test_name	string	Name of what was tested
status	string	pass fail pending
result	string	Full result text or error message
tested_at	string	ISO datetime
fixed	boolean	Has the issue been resolved
validator	string	Simpee Copilot Human ← NEW in v1.1

3-PANEL LAYOUT — CommandAIHub.jsx

LEFT PANEL 220px Quick Commands Test Results	CENTRE PANEL Flex — main area Chat Feed Input Bar Intent Chips	RIGHT PANEL 280px Code Preview Dual Validation Deploy Button
---	---	--

LEFT PANEL — Quick Commands + Test Status

Quick Commands (9 buttons)	1. Run Diagnostic 2. Show All Entities 3. Show All Functions 4. What should I build next? 5. Check Home Blueprint 6. Check AI Hub Blueprint 7. Run Copilot Validation ← NEW v1.1 8. Azure Dry Run ← NEW v1.1 9. Clear Chat Session
Test Results Feed	Last 5 TestLog records. Each row shows: test_name + validator badge + status badge. Green = pass Red = fail Amber = pending Click any row to expand full result.

CENTRE PANEL — Chat Feed + Input Bar

Top Status Bar	Title: Command AI Hub (Exo 2, 18px, bold, #5e50fb) Status dots: Simpee (green) Copilot (blue) Builder (grey standby)
User Messages	Right-aligned bubble. Background #5e50fb. White Montserrat text. Timestamp below in muted grey.
AI Response — 3 Cards	Card 1 ANALYSIS — white bg, grey border. What the AI understood. Card 2 SUGGESTION — white bg. Recommended approach or answer. Card 3 CODE / BRIEF — bg #ffffeb, border #fcd34d. Actual code or builder brief. Buttons on Card 3: [COPY] [MARK AS TESTED] [DEPLOY TO 5S PORTAL]
System Messages	Centre-aligned. Italic. Grey. E.g. 'Copilot validation complete — 3 issues found'
Intent Chips + Input	Chips (pick one): Diagnose · Build · Fix Bug · Connect · Brainstorm · Validate Text input full width. SEND button #5e50fb. Ctrl+Enter also sends. On SEND: save to SChatMessage → show typing dots → call aiCommandCentre → render 3 cards

RIGHT PANEL — Code Preview + Dual Validation + Deploy

Code Preview	Dark bg #1a1a1f. Monospace white text. Shows most recent CODE READY content. Scrollable.
Dual Validation Status	Two badges shown: SIMPEE [NOT CHECKED] amber → [VALIDATED] green → [ISSUES FOUND] red COPILOT [NOT CHECKED] amber → [VALIDATED] green → [ISSUES FOUND] red Deploy only enabled when BOTH show green.
Action Buttons	[COPY CODE] — copies preview to clipboard [MARK AS TESTED (Simpee)] — modal: Pass/Fail + notes → saves TestLog (validator=Simpee) [RUN COPILOT VALIDATION] — fires Copilot review → saves TestLog (validator=Copilot) [DEPLOY TO 5S PORTAL] — only active when BOTH validators green. Confirmation modal: 'Simpee + Copilot have approved this code. Deploy to live 5S Portal?' On confirm → posts to real portal NoticeBoard.
Deploy Log	Last 3 deploys at bottom. Timestamp + what was deployed + who validated.

9 CHECKPOINTS — All Must Pass Before Deploying to 5S Portal

Checkpoints 1-8 run by Simpee. Checkpoint 9 run by Copilot.

#	Checkpoint	Validator	What Is Checked	Result
1	Page renders clean	Simpee	No console errors. All 3 panels visible.	
2	Message saves	Simpee	Send message → SChatMessage record created.	
3	Function responds	Simpee	aiCommandCentre returns HTTP 200.	
4	3-card response	Simpee	Response renders as 3 cards — not raw JSON.	
5	Copy works	Simpee	COPY CODE copies to clipboard correctly.	
6	TestLog saves	Simpee	MARK AS TESTED creates TestLog record.	
7	Deploy gated	Simpee	DEPLOY disabled until both validators green.	
8	Deploy posts to portal	Simpee	NoticeBoard record created in live 5S Portal.	
9	Copilot Validation	Copilot	Code reviewed: syntax, logic, security, Azure readiness.	

STEP-BY-STEP BUILDER INSTRUCTIONS

1	Create new Base44 app Name it: Command AI Hub Do NOT work inside the existing 5S Portal.
2	Add SChatMessage entity Fields: sender, sender_type, role, message, timestamp, session_id, read (All string except read = boolean)
3	Add TestLog entity Fields: test_name, status, result, tested_at, validator (All string except fixed = boolean)
4	Paste to builder AI Prefix: 'Build CommandAIHub.jsx. 3-panel layout: left 220px quick commands + test log, centre flex chat feed + input, right 280px dual validation + code preview + deploy. SIMPLEX-ITY design: bg #e8e6fe, white cards, #5e50fb accent, Exo 2 bold headlines, Montserrat body. No emoji.' Then paste the 3-panel layout section of this document.

5	Wire the function Input bar ON SEND: POST https://simpee-62ac123d.base44.app/functions/aiCommandCentre Body: { instruction: '[INTENT] message', posted_by: 'Kieran' }
6	Share URL with Simpee Send app URL via WhatsApp or S-Chat. Simpee runs checkpoints 1-8.
7	Run Copilot Validation Use the 'Run Copilot Validation' quick command. Copilot runs checkpoint 9.
8	Fix any failures Simpee or Copilot reports exactly what failed with fix code.
9	Deploy when all 9 green Simpee generates final CommandAIHub.jsx → paste into live 5S Portal. Home page AI Hub banner button will point to this page.

DESIGN SYSTEM QUICK REFERENCE

Token	Value	Usage
Page Background	#e8e6fe	Lavender Wash — entire page bg
Card / Panel	#ffffff	All cards, AI message bubbles, panels
Left Panel bg	#f5f4fe	Slightly tinted — left command panel
Accent Violet	#5e50fb	Buttons, user bubbles, status dots, accents
Soft Lilac	#bab4fd	Borders, secondary elements
Body Text	#1a1a1f	All main text
Muted Text	#9896ad	Timestamps, labels, secondary info
Code bg	#1a1a1f	Dark code preview panel
Code text	#e8e6fe	Monospace text in code panel
Brief Card bg	#fffbeb	CODE READY response card background
Brief Card border	#fcd34d	Border of CODE READY card
Azure Blue	#0078d4	Copilot/Azure related UI elements
Headline Font	Exo 2 / Exo, bold	All headings, section labels
Body Font	Montserrat	Body text, inputs, chat messages
Border Radius	12-14px cards / 8px buttons	Consistent rounding throughout
No emoji	Text symbols only	No cartoon icons, no emoji anywhere
