

A-Beauty: Financial Allocation

Trial Phase Budgeting: HKD 500k vs. HKD 750k

CEO PROPOSAL | PRE-LAUNCH CAPITAL EFFICIENCY

STRATEGIC ALLOCATION OVERVIEW

HKD 500,000

The Lean Approach

Focus on ****Organic Tech Validation****. Uses high-confidence TINT AI as the moat with gifted influencer seeding (Nanos). Manual DaaS reporting to save development costs.

Goal: Prove the 15% transaction flywheel with minimal burn.

HKD 750,000

The Stretch Approach

Focus on ****Accelerated Data Moat****. Invests in micro-influencer paid seeding for guaranteed UGC and earlier automation of the internal DaaS dashboard.

Goal: Capture higher GMV & deeper data insights for Series A valuation.

HKD 500K ALLOCATION (6-MONTH TRIAL)

Investment Category	Monthly (HKD)	Total (6-Mo)	Core Objective
Tech & AI (TINT + Shopify)	HKD 12,000	HKD 72,000	Maintain 99% AI Try-On uptime
Influencer Seeding (Shipping)	HKD 25,000	HKD 150,000	Gifted samples to 200+ Nano Creators
Performance Ads (Awareness)	HKD 15,000	HKD 90,000	Driving traffic to creator Mini-Shops
Core Ops & Stipends	HKD 23,300	HKD 140,000	Lean 2-person founder execution
Operating Buffer	HKD 8,000	HKD 48,000	Technical fixes & logistics spikes

**Approach: High reliance on 15% revenue reinvestment starting in Month 4 to maintain growth.*

HKD 750K STRETCH ALLOCATION

Investment Category	Monthly (HKD)	Total (6-Mo)	Value Add / Stretch
Tech (TINT Ent. + Dash Build)	HKD 18,000	HKD 108,000	Automated internal ROI Dashboard
Paid Seeding (Micros)	HKD 40,000	HKD 240,000	Guaranteed high-quality US video UGC
Performance Ads (Scaling)	HKD 25,000	HKD 150,000	Whitelisting top-performing creator posts
Expert Hire (Part-Time)	HKD 15,000	HKD 90,000	Dedicated US-based Data Analyst
Core Ops & Stipends	HKD 27,000	HKD 162,000	Faster execution of Brand Onboarding

Why Stretch? Guarantees 3x higher UGC volume and 5x deeper brand reporting data.

CUMULATIVE GROWTH FORECAST

HKD 500k: Projected GMV

HKD 1.2M

HKD 750k: Projected GMV

HKD 4.5M

ROI Focus (500k)

Prioritizes **Burn Rate**. Goal is to reach breakeven on OPEX through 15% transaction fees by Month 6.

ROI Focus (750k)

Prioritizes **Valuation**. Goal is to build the "DaaS Moat" to secure a US\$5M+ Series A seed round.

INFLUENCER ACQUISITION & SEEDING

Cost of Seeding (US Market)

Average cost to gift a beauty product to a US Nano-influencer (inc. product + US shipping) is **HKD 1,200**.

- ✓ **500k Plan:** Gift 120 Nanos. Expect 25–30 organic posts.
- ✓ **750k Plan:** Gift 120 Nanos + Pay 40 Micros. Expect 60+ guaranteed videos.

TECH MOAT: TOOLING INVESTMENT

TINT AI

HKD 7.8k/mo. Usage-based virtual try-on engine. Essential for "Screenshot with Influencer" loops.

Internal ROI Dash

HKD 40k build. Proprietary code to track "Try-on to Transaction" conversion for DaaS revenue.

Shopify Plus

HKD 2.5k/mo. Backend stability & US/Canada localized payment gateway support.

DAAS REVENUE TIER STRATEGY

Tier Name	Annual Price	Learning for Brand	Status
Essential (SKU)	HKD 35,000	Monthly Best-Seller & SKU Performance	Manual Reporting
Strategic (Trend)	HKD 100,000	Weekly Try-on Heatmaps & Price Elasticity	Semi-Automated
Elite (Moat)	HKD 350,000	Predictive ROI & Competitor Secret Data	Full Dashboard (Stretch)

Revenue Goal: HKD 200k in DaaS pre-sales by Month 6 Trial End.

MILESTONE SCHEDULE (500K VS 750K)

| ECONOMIC LOGIC: THE 15% FLOW

Zero Cost to Brands?

Yes. The 15% "Transaction Fee" covers: **Influencer Commission (8%) + Payment Processing (3%) + Tech Overhead (4%).**

Brands pay nothing unless a sale is made. Influencers earn more than Amazon because of our ****higher conversion via AI****.

15%

TOTAL FEE

Split: 8% Creator / 7% Platform & Tech

WINNING US CONFIDENCE

*"We don't sell beauty. We sell ****Certainty****."*

By using TINT AI shade-matching, we eliminate the #1 reason US customers return Asian Beauty: ****Wrong Shade Match.****

TRIAL DURATION

Strategic Recommendation: HKD 750k (Stretch)

The additional 250k secures the ****Data Dashboard**** earlier, allowing us to pivot from a marketplace to a DaaS company before competitors replicate our AI loop.
