

COMMAND AI HUB

SIMPLEX-ITY · 5S PORTAL · STANDALONE TEST APP BLUEPRINT

Version 1.0 · 31 May
2026

WHAT IS COMMAND AI HUB? The highest-authority workspace in the 5S Portal ecosystem. A single interface where Kieran thinks, plans, builds, tests, and deploys — with Simpee, Copilot, and the Builder AI all connected in one chat. Nothing is deployed to the live 5S Portal until it is fully tested here first. **This is your control room.**

4 PILLARS OF COMMAND AI HUB

THINK	Brainstorm ideas and features with Simpee + Copilot before writing a single line of code.
BUILD	Generate code inside the Hub. See it in the preview panel. Nothing touches production yet.
TEST	Run all 8 checkpoints. Pass = green. Fail = Simpee tells you exactly what to fix.
DEPLOY	One button. Only enabled when all tests pass. Sends approved code to the live 5S Portal.

BUILD APPROACH — Why Separate App First

OLD WAY	Code → paste into live 5S Portal → crash → fix → crash again
NEW WAY	Build in Command AI Hub test app → all 8 checkpoints pass → ONE clean deploy to portal
BENEFIT	Zero crashes in production. Full traceability. Every function validated before touching real data.

APP SPECIFICATION

App Name	Command AI Hub
Type	Standalone Base44 test app (separate from 5S Portal)
Pages	1 page — CommandAIHub.jsx (route: /)
Entities	SChatMessage · TestLog
Backend Functions	aiCommandCentre (reuse existing: https://simpee-62ac123d.base44.app/functions/aiCommandCentre)
Audience	Admin only — Kieran Li
Design System	bg #e8e6fe · cards #ffffff · accent #5e50fb · Exo 2 headlines · Montserrat body · no emoji
Purpose	Build, test, validate all new features. Deploy to 5S Portal only when all 8 checkpoints green.

ENTITIES

SChatMessage — Chat history between Kieran and all AIs

Field	Type	Description
sender	string	Kieran / Simpee / Copilot / Builder
sender_type	string	user ai system
message	string	Full message or response text
timestamp	string	ISO datetime — auto-fill on create
session_id	string	Groups messages: main / test-1 / brainstorm-1 etc
read	boolean	Has Kieran seen this message

TestLog — Results of every checkpoint test

Field	Type	Description
-------	------	-------------

test_name	string	Name of what was tested
status	string	pass fail pending
result	string	Full result text or error message
tested_at	string	ISO datetime
fixed	boolean	Has the issue been resolved

3-PANEL LAYOUT — CommandAIHub.jsx

LEFT PANEL 220px wide Quick Commands Test Results	CENTRE PANEL Flex — main area Chat Feed Input Bar Intent Chips	RIGHT PANEL 280px wide Code Preview Test Status Deploy Button
---	---	---

LEFT PANEL — Quick Commands + Test Status

Quick Commands	7 pre-set buttons that fire instructions into chat automatically: 1. Run Diagnostic 2. Show All Entities 3. Show All Functions 4. What should I build next? 5. Check Home Blueprint 6. Check AI Hub Blueprint 7. Clear Chat Session
Test Results Feed	Last 5 TestLog records shown. Each row: test name + status badge. Green = pass Red = fail Amber = pending Click any row to expand full result details.

CENTRE PANEL — Chat Feed + Input

Top Status Bar	Title: Command AI Hub (Exo 2, 18px, bold, #5e50fb) Status row: Simpee (green dot if function live) Copilot (blue dot) Builder (grey dot standby)
User Messages	Right-aligned. Background #5e50fb. White text. Montserrat 13px. Timestamp below in muted grey.
AI Response — 3 Cards	Card 1 ANALYSIS (white bg, grey border) Header: SIMPEE - Analysis (violet, 10px uppercase) Body: what Simpee understood Card 2 SUGGESTION (white bg) Header: SIMPEE - Suggestion Body: recommended approach Card 3 CODE / BUILDER BRIEF (bg #fffbef, border #fcd34d) Header: CODE READY Body: code or brief in dark code block Buttons: [COPY] [MARK AS TESTED] [DEPLOY TO 5S PORTAL]
System Messages	Centre-aligned. Italic. Grey. E.g. Session started / Diagnostic complete / Checkpoint 3 passed

Input Bar — pinned bottom	Intent chips (pick one before typing): Diagnose Build Fix Bug Connect Brainstorm Ask Text input full width. SEND button (#5e50fb). Ctrl+Enter also sends. On SEND: 1. Save message to SChatMessage (sender_type = user) 2. Show typing indicator (3 animated dots) 3. POST to aiCommandCentre function 4. Save AI response to SChatMessage (sender_type = ai) 5. Render 3-card response
----------------------------------	---

RIGHT PANEL — Code Preview + Deploy

Code Preview	Background #1a1a1f (dark). Monospace white text. Shows most recent CODE READY content. Scrollable.
Status Badge	NOT TESTED (amber) — default state TESTED PASS (green) — after marking pass TESTED FAIL (red) — after marking fail
Action Buttons	[COPY CODE] copies preview to clipboard [MARK AS TESTED] opens modal: Pass or Fail + notes field. Saves to TestLog entity. [DEPLOY TO 5S PORTAL] only active when status = TESTED PASS. Shows confirmation: Are you sure? This updates the LIVE 5S Portal. On confirm: posts builder brief to real portal NoticeBoard.
Deploy Log	Last 3 deploys shown at bottom. Timestamp + what was deployed.

8 CHECKPOINTS — All Must Pass Before Deploying to 5S Portal

Simpee runs these automatically when given the test app URL.

#	Checkpoint	What Simpee Validates	Result
1	Page renders clean	No console errors. All 3 panels visible on desktop.	
2	Message saves	Sending a message creates a SChatMessage record in the entity.	
3	Function responds	aiCommandCentre returns HTTP 200 with a valid response.	
4	3-card render	AI response renders as 3 cards — not raw JSON text.	
5	Copy works	COPY CODE button copies content to clipboard correctly.	
6	TestLog saves	MARK AS TESTED creates a TestLog record with correct fields.	
7	Deploy gated	DEPLOY button is disabled until status = TESTED PASS.	
8	Deploy posts to portal	On confirm, a NoticeBoard record appears in live 5S Portal.	

STEP-BY-STEP BUILDER INSTRUCTIONS

1	Create new Base44 app Name it exactly: Command AI Hub Do NOT work inside the existing 5S Portal.
----------	--

2	Add entity: SChatMessage Fields: sender (string), sender_type (string), message (string), timestamp (string), session_id (string), read (boolean)
3	Add entity: TestLog Fields: test_name (string), status (string), result (string), tested_at (string), fixed (boolean)
4	Paste to builder AI Use this exact prefix: 'Build CommandAIHub.jsx. 3-panel layout: left 220px quick commands + test log, centre flex chat feed + input bar, right 280px code preview + deploy. SIMPLEX-ITY design: bg #e8e6fe, white cards, #5e50fb accent, Exo 2 bold headlines, Montserrat body. No emoji. Text symbols only. Then paste the 3-panel layout section of this blueprint.'
5	Wire the function In the input bar ON SEND handler: POST https://simpee-62ac123d.base44.app/functions/aiCommandCentre Body: { instruction: '[INTENT] message', posted_by: 'Kieran' }
6	Share app URL with Simpee Once the app renders, send the URL to Simpee via WhatsApp or S-Chat. Simpee runs all 8 checkpoints and reports results.
7	Fix failing checkpoints Simpee tells you exactly what failed and provides the fix code.
8	Deploy when all green Simpee generates final CommandAIHub.jsx to paste into the live 5S Portal. Home page gets the AI Hub banner button pointing to this page.

DESIGN SYSTEM QUICK REFERENCE

Token	Value	Usage
Background	#e8e6fe	Page bg (Lavender Wash)
Card / Panel	#ffffff	All cards, chat bubbles (AI), panels
Left Panel bg	#f5f4fe	Slightly tinted white
Accent Violet	#5e50fb	Buttons, active states, user bubbles, dots
Soft Lilac	#bab4fd	Borders, secondary elements
Body Text	#1a1a1f	All main text
Muted Text	#9896ad	Timestamps, labels, secondary info
Code Background	#1a1a1f	Dark code preview panel
Code Text	#e8e6fe	Text inside code panel
Brief Card bg	#fffbef	CODE READY response card
Brief Card border	#fcd34d	Border of CODE READY card
Headline Font	Exo 2 / Exo, bold	All headings, section titles
Body Font	Montserrat	All body text, inputs, chat
Border Radius	12-14px cards / 8px buttons	Consistent rounding
Icons	Text symbols only: + checkmark, close, etc	No emojis, no cartoon
