

COMMAND AI HUB

SIMPLEX-ITY · 5S PORTAL · MULTI-AI COMMAND CENTRE BLUEPRINT

Version 1.2 · 31 May
2026

Co-authored: Kieran Li + Simpee + Edge (Copilot)

New in v1.2: Multi-AI
Connector + Live Status
Panel

WHAT'S NEW IN v1.2 — Multi-AI Connector Layer

Multi-AI Status Panel	Live indicator panel showing online/offline status for every AI available on Base44: Automatic, Gemini 3.1 Pro
AI Selector	Before sending a message, Kieran picks which AI(s) to route to. Can select one, multiple, or Automatic (best)
AIConnector Entity	New entity storing each AI model's name, provider, status, last_tested, and response_time. Updated automa
Ping Function	New backend function: pingAllAI — pings each model with a test prompt, records latency + online status to A
Status Indicator	Each AI shown as a card in the status panel: name + provider logo colour + green/amber/red dot + last teste
Response Attribution	Every AI response card now shows which model generated it (e.g. GEMINI 3.1 PRO — Analysis). Full trace

AI MODEL ROSTER — All 8 Connectors

Source: Base44 built-in AI connectors (seen in screenshot). All available without external API keys.

ID	Model Name	Provider	Type	Indicator Colour	Use Case
0	Automatic	Base44	Auto-router	Violet #5e50fb	Best for general requests — picks best model per task
1	Gemini 3.1 Pro	Google	Frontier	Blue #4285f4	Research, long context, web grounding
2	Claude Sonnet 4.6	Anthropic	Balanced	Amber #d97706	Writing, analysis, reasoning — fast
3	Claude Opus 4.6	Anthropic	Advanced	Amber #d97706	Deep reasoning, complex logic
4	Claude Opus 4.8	Anthropic	Frontier NEW	Orange #f59e0b	Latest Opus — most capable Anthropic
5	GPT-5.4	OpenAI	Advanced	Green #10a37f	Code generation, structured output
6	GPT-5.5	OpenAI	Frontier NEW	Green #10a37f	Most capable OpenAI — brainstorm + build
7	Copilot (Edge)	Microsoft	External	Azure #0078d4	Validation, Azure readiness, security review

NEW ENTITY — AIConnector

Stores live status of every AI model. Updated automatically by the pingAllAI function.

Field	Type	Values / Description
model_id	string	0–7 matching roster above
model_name	string	Automatic / Gemini 3.1 Pro / Claude Sonnet 4.6 / etc
provider	string	Base44 / Google / Anthropic / OpenAI / Microsoft
status	string	online offline degraded unknown
response_time_ms	number	Last ping response time in milliseconds
last_tested	string	ISO datetime of last ping
is_selected	boolean	Is this model currently selected by Kieran for next message
notes	string	Any issues or observations from last ping

NEW BACKEND FUNCTION — pingAllAI

Item	Detail
Function name	pingAllAI
Trigger	On demand (Quick Command button) or scheduled (every 30 min optional)
What it does	Sends a lightweight test prompt ('ping') to each Base44 AI model in sequence. Records response time and online status
Test prompt	'Respond with OK only. This is a connectivity test.'
Success condition	Response received within 10 seconds
Failure condition	Timeout or error → status = offline or degraded
Return format	{ results: [{ model_name, status, response_time_ms, tested_at }] }
Frontend action	After ping completes, status panel dots update in real time (green/amber/red)
Copilot check	Copilot ping is a manual check — button fires a test message to Edge and waits for response. Copilot is external so m

UPDATED 3-PANEL LAYOUT — v1.2 Changes

LEFT PANEL 220px Quick Commands AI Status Panel Test Results	CENTRE PANEL Flex — main area AI Selector Row Chat Feed Input Bar	RIGHT PANEL 280px Code Preview Dual Validation Deploy Button
--	--	--

LEFT PANEL — Quick Commands + AI Status + Test Results

Quick Commands (10 buttons)	1. Run Diagnostic 2. Show All Entities 3. Show All Functions 4. What should I build next? 5. Check Home Blueprint 6. Check AI Hub Blueprint 7. Ping All AI ← NEW v1.2 — tests all 8 models 8. Run Copilot Validation 9. Azure Dry Run 10. Clear Chat Session
AI STATUS PANEL ← NEW v1.2	Shows all 8 AI models as status cards, stacked vertically. Each card: Model name (Exo 2, 9px) Provider tag (coloured pill: violet/blue/amber/green/azure) Status dot: green=online amber=degraded red=offline grey=unknown Last tested timestamp (muted, 7px) Response time in ms Header: 'AI MODELS' with [PING ALL] button top-right. Updates live after each ping.
Test Results Feed	Last 5 TestLog records. Each: test_name + validator badge + status badge. Click to expand full result.

CENTRE PANEL — AI Selector + Chat + Input

Top Status Bar	Title: Command AI Hub (Exo 2, 18px, bold, #5e50fb) Status row — compact dots only (full detail in left panel): ● Auto ● Gemini ● Sonnet ● Opus ● GPT-5 ● Copilot
----------------	---

AI SELECTOR ROW ← NEW v1.2	Horizontal scrollable chip row between status bar and chat feed. One chip per model. Click to select/deselect. Selected chip: filled #5e50fb white text. Unselected: outline, muted text. Default: Automatic selected. Multiple selection allowed for parallel responses. Chips: [Auto] [Gemini 3.1] [Sonnet 4.6] [Opus 4.6] [Opus 4.8] [GPT-5.4] [GPT-5.5] [Copilot]
Chat Feed	User messages: right-aligned, #5e50fb bg, white text. AI Response cards (one set per selected model if multiple): Card header shows which AI responded: e.g. 'GEMINI 3.1 PRO' Card 1 ANALYSIS — white bg Card 2 SUGGESTION — white bg Card 3 CODE/BRIEF — #fffbeb bg, #fcd34d border Buttons: [COPY] [MARK AS TESTED] [DEPLOY] If multiple AIs selected: responses shown side by side or stacked with clear model label on each.
Input Bar	Intent chips: Diagnose · Build · Fix Bug · Connect · Brainstorm · Validate Text input. SEND button. Ctrl+Enter. On SEND: save to SChatMessage with selected model(s) in role field → call aiCommandCentre → render cards.

RIGHT PANEL — Code Preview + Dual Validation + Deploy

Code Preview	Dark bg #1a1a1f. Monospace white. Most recent CODE READY content. Scrollable. Model attribution shown above preview: 'Generated by GPT-5.5'
Dual Validation	SIMPEE [NOT CHECKED] → [VALIDATED] → [ISSUES] COPILOT [NOT CHECKED] → [VALIDATED] → [ISSUES] Both must be green to enable DEPLOY.
Deploy Button	Disabled until both validators green. Confirmation: 'Simpee + Copilot approved. Deploy to 5S Portal?' On confirm: posts to 5S Portal NoticeBoard.
Deploy Log	Last 3 deploys. Timestamp + what + which model generated it.

10 CHECKPOINTS — Updated for v1.2

Checkpoints 1-9 by Simpee. Checkpoint 10 by Copilot.

#	Checkpoint	Validator	What Is Checked	Result
1	Page renders clean	Simpee	All 3 panels + AI selector visible. No errors.	
2	SChatMessage saves	Simpee	Message send → SChatMessage record created with role field.	
3	aiCommandCentre responds	Simpee	Function returns HTTP 200 with structured response.	
4	3-card render	Simpee	Response renders as Analysis+Suggestion+Code cards.	
5	AI selector works	Simpee	Selecting a model chip updates the selected model for next send.	
6	pingAllAI function	Simpee	Ping fires, all 8 models tested, AIConnector entity updated.	
7	Status panel updates	Simpee	After ping, left panel dots update green/amber/red correctly.	
8	TestLog saves	Simpee	MARK AS TESTED creates TestLog record with validator field.	

9	Deploy posts to portal	Simpee	NoticeBoard record created in live 5S Portal on deploy.	
10	Copilot validation	Copilot	Code reviewed: syntax, logic, security, Azure readiness.	

FULL ENTITY LIST — v1.2

Entity	Status	Key Fields	Purpose
SChatMessage	Existing	sender, sender_type, role, message, timestamp, session_id, history	Chat history — all AI conversations
TestLog	Existing	test_name, status, result, tested_at, fixed, validator	Checkpoint test results
AIConnector	NEW v1.2	model_id, model_name, provider, status, response_time_ms, last_tested, is_selected, notes	Live status of AI models

BUILDER INSTRUCTIONS — v1.2 Updates

1	Add AIConnector entity In Nexus Command app, add new entity: AIConnector Fields: model_id (string), model_name (string), provider (string), status (string), response_time_ms (number), last_tested (string), is_selected (boolean), notes (string)
2	Seed AIConnector records Create 8 records — one per AI model from the roster table above. Default status = 'unknown' for all. is_selected = true for model_id=0 (Automatic) only.
3	Build pingAllAI function Backend function that: 1. Sends 'Respond with OK only. This is a connectivity test.' to each Base44 model 2. Records response time in ms 3. Updates AIConnector entity record for that model 4. Returns summary of all results
4	Add AI Status Panel to left Below Quick Commands, add AI STATUS section. 8 cards stacked. Each: model name + provider colour pill + status dot + last_tested + response_ms. [PING ALL] button at top-right of section header.
5	Add AI Selector Row to centre Horizontal chip row below the status bar, above chat feed. 8 chips. Click = select. Default = Auto selected. Multiple selection allowed.
6	Update response cards Each AI response card header shows which model responded. If multiple models selected, show one card set per model with clear label.
7	Wire Ping All quick command Quick Command button 7 'Ping All AI' fires pingAllAI function and refreshes the status panel on completion.
8	Tell builder exact prefix 'Update CommandAIHub.jsx with Multi-AI connector. Add AIConnector entity, pingAllAI function, AI status panel in left panel, AI selector chip row in centre panel above chat. Same design system: #e8e6fe bg, #5e50fb accent, Exo 2 headlines, Montserrat body. No emoji.'

AI MODEL COLOUR SYSTEM

AI / Provider	Dot Colour	Hex	Chip Style
---------------	------------	-----	------------

Automatic (Base44)	Violet	#5e50fb	Filled violet, white text
Gemini 3.1 Pro (Google)	Blue	#4285f4	Blue border, blue text
Claude Sonnet 4.6 (Anthropic)	Amber	#d97706	Amber border, amber text
Claude Opus 4.6 (Anthropic)	Amber	#d97706	Amber border, amber text
Claude Opus 4.8 (Anthropic)	Orange	#f59e0b	Orange border, orange text — NEW badge
GPT-5.4 (OpenAI)	Teal	#10a37f	Teal border, teal text
GPT-5.5 (OpenAI)	Teal	#10a37f	Teal border, teal text — NEW badge
Copilot (Microsoft Edge)	Azure	#0078d4	Azure border, azure text — external
Status: Online	Green	#22c55e	Pulsing green dot
Status: Degraded	Amber	#f59e0b	Amber dot
Status: Offline	Red	#ef4444	Red dot
Status: Unknown	Grey	#9896ad	Grey dot — not yet tested
